

YUVRAJ GOVIND RAO

Software Development Engineer

Greater Noida, UP 201310 | +91 7004890027 | yuvrajgovindrao@gmail.com | [GitHub](#) | [Portfolio](#)

SUMMARY

B.Tech Computer Science graduate (2026) who designs, builds, and deploys full-stack products end-to-end — REST APIs and SQL/NoSQL databases on the backend, React/TypeScript on the frontend, hosted and tested on Microsoft Azure. Shipped three personal projects solo, from system architecture through production deployment, including LLM-powered retrieval systems. Seeking a Software Development Engineer role building and owning features from whiteboard to production.

CORE SKILLS

Languages & Frameworks: Python, JavaScript, TypeScript, FastAPI, React, LangChain

APIs & Architecture: REST API Design, Microservices, Prompt/Query Routing

Databases (SQL & NoSQL): PostgreSQL, SQLite, Qdrant

AI / LLM Engineering: Retrieval-Augmented Generation (RAG), LLM APIs (Gemini, OpenAI), PyTorch

Cloud & DevOps: Microsoft Azure (App Hosting, Deployment Testing), Docker / Docker Compose, Git/GitHub

Core CS: Data Structures & Algorithms, Object-Oriented Programming

PROJECTS

GraphRAG — Knowledge Graph-Enhanced Q&A Platform | [GitHub](#)

- Merged 100+ entities into a Neo4j knowledge graph in under 1.5 seconds, using an automated entity/relationship extraction pipeline with UNWIND-batched Cypher writes.
- Achieved zero broken relationship links across the full graph by combining Qdrant vector search with Neo4j graph traversal in a hybrid RAG pipeline built on FastAPI, Gemini, and OpenAI.

YouTubeRAG — Multi-Video RAG Assistant | [GitHub](#)

- Delivered second-accurate, clickable citations on cross-video Q&A using cosine similarity search over 768-dimension embeddings and sentence-aware caption chunking.
- Shipped two deployment profiles — unlimited local dev and a rate-limited public demo (5 videos/collection, 10 requests/hour) — from one Docker Compose codebase with automated GitHub Actions CI.

macOS-Inspired Interactive Portfolio | [GitHub](#)

- Built a fully interactive macOS-style desktop UI in React/TypeScript, managing open/close/focus/drag state across 5+ simulated apps through a custom Zustand window manager.
- Hosted and tested the production build on Microsoft Azure, and shipped an in-app “Ask AI” feature so visitors get answers without leaving the interface.

EXPERIENCE

User Trial Program Participant — Nothing Technology | 2024 – 2025

- Selected for a pre-launch beta program to test unreleased consumer hardware, submitting structured bug, UX-friction, and performance reports ahead of public launch.

EDUCATION

B.Tech, Computer Science & Engineering (Game Technology) — Galgotias University, 2026 | CGPA: 7.0 / 10

CERTIFICATIONS

AWS Certified Data Engineer | Google Android Developer Certification
